TESTIMONIAL FOR RURAL BUILDING SOLUTIONS LIMITED

We engaged Rural Building Solutions Limited to build a 50 bail rotary dairy shed for us for the 2011/12 season after seeing the high standard of workmanship and superior design on a cowshed that they had recently completed in our district.

Nigel Hodges builder and director of RBS was our main point of contact. Throughout the entire process he was reliable, well-organized and dealt with any alterations and problems that we encountered with professionalism and ease. The building site was always kept tidy from day one to completion, the subcontractors were on schedule and the end result was as high-quality as we expected.

The input and suggestions from previous cowshed builds by Nigel were extremely useful. His communication skills were excellent, nothing was a problem.

Overall we have found the design of the cowshed, yards etc to work very well having nearly completed our first season.

We wouldn't hesitate to recommend Rural Building Solutions to anyone contemplating building in the future.
