TESTIMONIAL FOR RURAL BUILDING SOLUTIONS LTD

LK Farms Darfield was looking to build a new Dairy shed. We engaged Rural Building Solutions Ltd to build a 54 bail rotary dairy shed for milking at the start of the 2013-14 season. We had known of RBS through another client and went on a tour of half a dozen sheds in the area. Two of RBS and the others of two different builders. Got an estimate from all three. RBS on face value were the dearest by quite a margin but I liked the look of their finished product. Not just a shed!!

As the building progressed it became apparent why the quote was the dearest. Nigel Hodges as builder/director of RBS, was our main point of contact. Nigel's management of the site works, materials, workers, and sub-contractors, appeared effortless. The whole operation went very smoothly. The only delay was 65mm of rain the night before 22 loads of concrete was due. Nigel couldn't fix that one!! But he still went on to complete ahead of schedule and on budget. As with all new buildings of this scale we changed a few things along the way and Nigel accommodated the changes with ease.

Rural Building Solutions attention to detail was their best attribute and working with them was a pleasure. At times we felt we had nothing to do as Nigel had already organised it. I was told a project manager was a good option. We had our project manager in Nigel as he said to me he needs to manage the subcontractors, materials, deliveries and all aspects of the job as he couldn't afford to be kept waiting. Each new task always relies on the previous one to be finished. Time is money.

The overall experience was a pleasure and we would both use RBS again and recommend them to anyone.
