## **TESTIMONIAL FOR RURAL BUILDING SOLUTIONS LTD**

Waitanui is a dairy conversion property located near Rotherham, North Canterbury. Waitanui Ltd engaged Rural Building Solutions Ltd to build a 60 bail rotary dairy shed because the directors were impressed with the dairy shed design and the finished projects that our team was shown. A competitive and detailed quote was subsequently accepted, and engagement of RBS occurred mid 2010.

The building consent was issued in mid August 2010, and we were milking on the 22<sup>nd</sup> October 2010. We found that working with Nigel Hodges as builder/director of RBS, and the main point of contact between Waitanui and RBS to be exemplary. Nigel listened to what we wanted, and worked with us to achieve a building we're very proud of. Notable was the attention to detail and the precise documentation of alterations was appreciated.

The management of the job site, workers, and sub-contractors was of a high standard and this is a testament to the ability of the managers of RBS. The time-frame we requested of RBS was tight, and to its credit, the company achieved the proposed finishing date on time. This was a remarkable effort and one that shows RBS to be a highly capable team well lead by Nigel.

Overall, we found that working with Rural Building Solutions was excellent and we would thoroughly recommend them as a builder of high quality rotary dairy sheds.

Should the opportunity arise in the future we would definitely use RBS again.
